Experience Romney For President Inc., Boston, MA • May 2012 – Present

Digital Department Special Projects Manager

Capitalizing on my experience in political campaigns, social media, and developer background, I successfully completed multiple projects including but not limited to: maintaining the national campaign store, conceptualizing the design of a next generation call from home system, and streamlining the data collection process from all incoming sources (i.e. donors, Facebook, and website sign-ups including volunteers, coalitions, and other forms). This streamlined data is now utilized for the purposes of maintaining one central list for fund-raising, event notification, voter outreach, etc. Additionally, this system has become the blueprint for the future of RNC data collection and storage.

Newt 2012 Inc., Washington, DC ■ Nov 2011 – May 2012

Social Media Director / Digital Director

Coordinated the establishment and management of Newt 2012 campaign Social Media properties, including Facebook, Twitter, YouTube, Google+, Foursquare, and Flickr. Successfully launched the first presidential candidate on Instagram and Pinterest. Collaborated with coalitions building, online fundraising and donor networks, email marketing, and every facet of the campaigns digital image.

Vaught Consulting LLC., Phoenix, AZ ■ Nov 2010 – Present *Social Media Strategy / PHP Developer*

Focusing on client projects for Social Media Strategy and

implementation as well as web development. Some examples are: creating and implementing strategies that include updating the client's website/blog, Google+, Facebook and Twitter; identifying and engaging thought leaders in all areas of the web such as bloggers/youtubers/podcasters/etc.; planning and hosting online events to continue to build momentum; comment marketing; and more.

Friends of John McCain Inc., Phoenix, AZ • Aug 2009 – Nov 2010 Social Media Manager / Web Strategist

Created and managed the Internet strategy for the McCain 2010 Senate Re-Election Campaign. This includes managing the email campaigns, maintaining and updating the website, JohnMcCain.com, as well as creating and maintaining smaller single purpose sites. Duties also include running Twitter, Facebook, text message and YouTube accounts. Additional duties include blogger outreach and leading a small team monitoring and responding to what others are saying on the Web.

Seesmic Inc., San Francisco, CA • Dec 2007 – Jan 2009 *Content Creator / Blogger*

Leading a small team of bloggers to create timely, well written content for the corporate blog. This includes keeping the Seesmic community engaged with the content and continually adding useful and relevant subject matter from within the Seesmic community as well as from outside of it.

Electric Sheep Company, Washington D.C. • Dec 2006 – Apr 2007 *Project Manager / Producer*

Held the position of Project Manager overseeing the corporate builds in the virtual world of Second Life. Built amazing projects for companies such as IBM Codestation, the largest home builder in Italy, AOL, STA Travel, Bantam Books with Dean Koontz, NBA All-Star Weekend, NBC Virtual Tree lighting, WEF in Davos, etc.

Fidelity National Financial, Santa Ana, CA ■ Oct 2005 – Jan 2007 *Lead PHP Software Engineer*

As the lead corporate PHP developer, I created and maintained dynamic web sites and databases. I initially had to build my entire development environment and managed full implementation from development to deployment. In the course of my job, I initiated, planned, and executed every aspect of my projects. I effectively organized the budget, time line and scope of projects by maintaining communication with clients and providing appropriate documentation and deliverables.

Created applications to assist operations and management to complete tasks which were time consuming and provided valuable, timely information.

Education Bachelor of Science • Computer Information Systems

DeVry University • Phoenix, Arizona

Graduated: October 2002
